

Message from the CEO

Dear Reader,

The Triple Helix is a completely unique organization, created and run entirely by undergraduates devoted to creating a global forum for science in society. What at first appears a focused interest is actually an eclectic vision that ventures to present ideas from students studying medicine, law, math and so much more. With more than 20 chapters across the world and more than 1,000 students from a wide range of disciplines, The Triple Helix offers a truly unique presentation of academic passion.

Before you look through The Science in Society Review issue awaiting you, I hope to share with you my insight into the level of work behind every word. Each piece represents not only the work of the writer, but also the work of one-on-one associate editors, a highly effective editorial board, astute international senior literary editors, an impressive faculty review board, and an imaginative production staff that reinvents the journal every issue.

As we enter the next cycle, I hope to witness the next surge of interest and passion from every member as we strive to achieve the dreams we have always had for the organization. We invite you as readers and supporters to come forward and develop new visions that will push us to the next level.

Sincerely,
Bharat Kilaru, CEO, The Triple Helix, Inc.

Triple Helix Events, Michaelmas 2010

Too many people, not enough planet? - Sponsored by the Development Studies Association
